

Subject: Advanced Web Development Frameworks (ITUE301) | Semester: 5th**Practical Statement:**

To develop a RESTful Task Management API using Node.js and Express.js. The application implements CRUD (Create, Read, Update, Delete) operations using an in-memory array, applies request logging middleware, Content-Type validation middleware, route-specific task ID validation, custom 404 handling, and centralized global error handling while returning appropriate HTTP status codes.

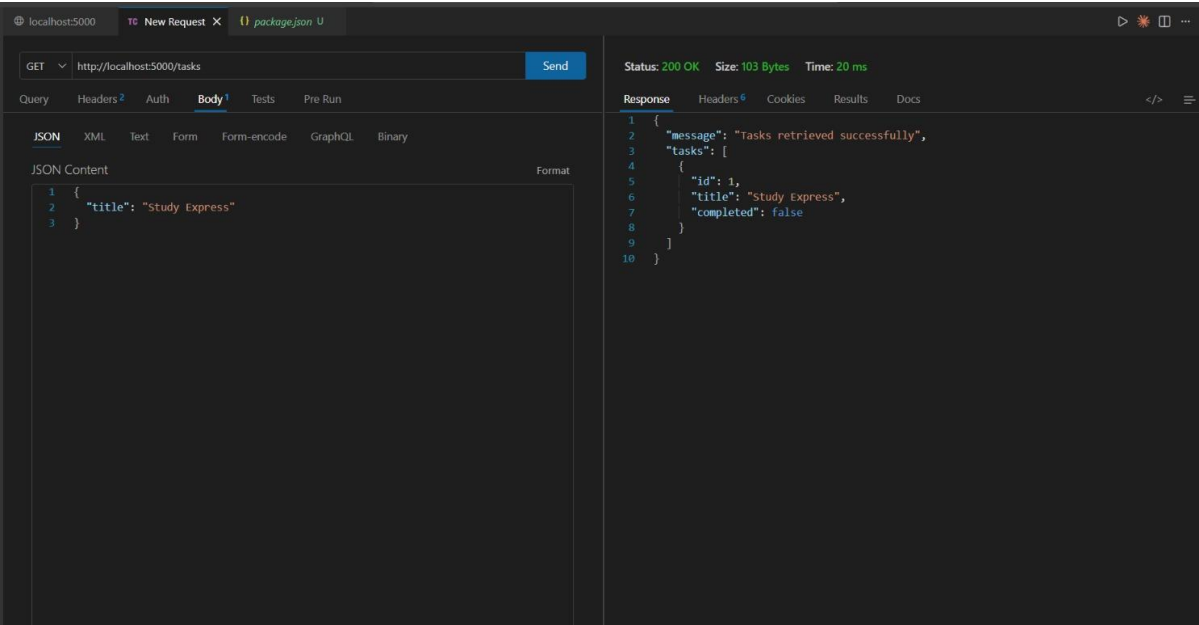

Screenshots:

```
POST http://localhost:5000/tasks

{
  "title": "Study Express"
}
```

Status: 201 Created Size: 97 Bytes Time: 52 ms

```
{
  "message": "Task created successfully",
  "task": {
    "id": 1,
    "title": "Study Express",
    "completed": false
  }
}
```

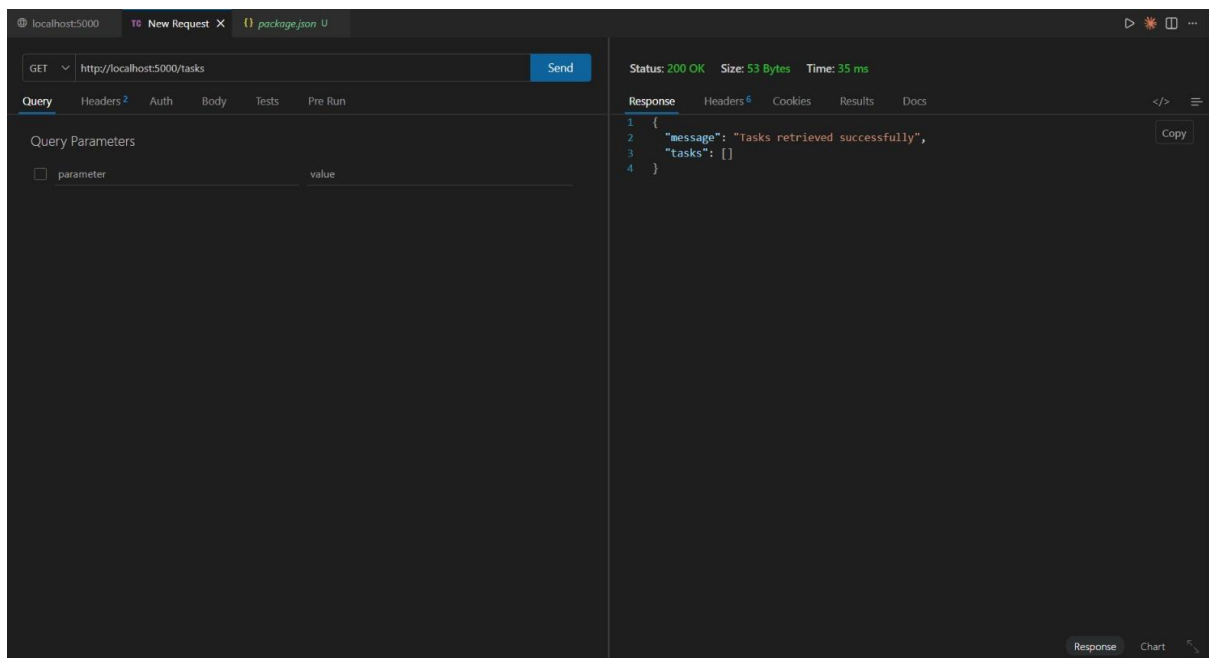

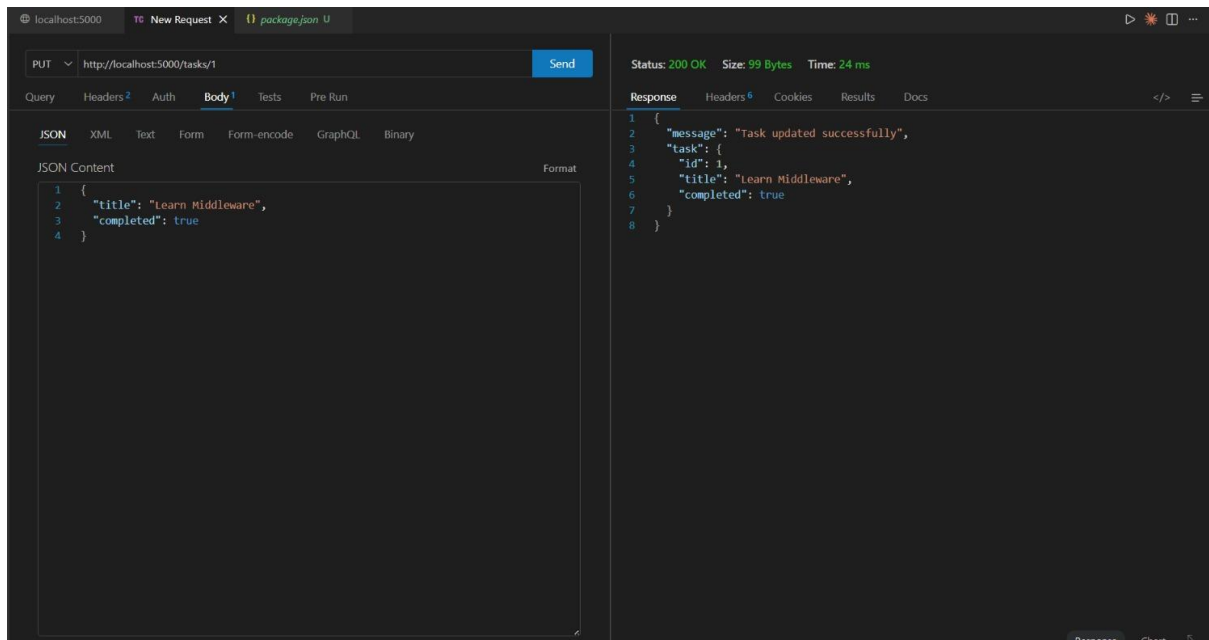

```
GET http://localhost:5000/tasks
```

Status: 200 OK Size: 103 Bytes Time: 20 ms

```
{
  "message": "Tasks retrieved successfully",
  "tasks": [
    {
      "id": 1,
      "title": "Study Express",
      "completed": false
    }
  ]
}
```
